Guides at “The Australian Arid Lands Botanic Garden” are volunteers who have a specific knowledge of plants and other features of the Garden.

This list may be used when working with a guide and will give the guides an indication of the information you are seeking.

Keep your eyes and ears open. Listen carefully to the guide.

Tick or color the boxes as you find the plants etc. See who can find the most items in your group.

Call out BINGO when you find all the items or see who can find the most in your group.
